

Education HEROES

welcome to STAEDTLER

We've been supplying quality stationery products for the education sector for over 40 years and our history goes back much further. The company was officially founded in 1835 but records show that one of the founder's ancestors was actually making pencils as early as 1662.

With such an impressive heritage, the STAEDTLER name has long been synonymous with the highest standards in design, technology, functionality and quality. Our constantly evolving product range comprises writing and drawing instruments for school, home and work use. Many of these products are instantly recognisable 'classics', such as the Noris HB pencil, the most widely used in Europe, the Mars plastic eraser and the stick pen to name but a few.

We know that quality is particularly important in the school environment and that's why teachers have come to know and trust the STAEDTLER brand. Reliability is everything and we are confident that our range will continue our long tradition of quality.

Alongside tried and trusted favourites, we also have some more recent innovations for you, demonstrating our commitment to ongoing product development. We are particularly proud of Noris colour, our latest premium colouring pencil which offers very real improvements and significant environmental benefits.

Another innovation from STAEDTLER is the FIMO kids classpack. These exciting themed packs contain creative projects for the whole class using FIMO kids, the specially formulated child's version of our popular polymer modelling clay.

To make this catalogue quick and easy to use, we have included a handy reference guide so that you can see the product's benefits and applications at a glance and a colour coded section indicator.

STAEDTLER and the environment

As befits a major international manufacturer, we take our environmental responsibilities very seriously indeed and ensure that we act both ecologically and efficiently all the time.

We operate a self-imposed eco-controlling programme that is far more demanding than most official environmental labels. Environmental compatibility is already incorporated in the development of new products and manufacturing processes; raw materials and energy are used as sparingly as possible and close attention paid to internal recycling possibilities and reducing the accumulation of pollutants.

The goal is a reduction of CO² emissions in all processes. We develop clear production solutions that are not only environmentally friendly but are also more efficient, and we place high importance on the longevity of our products.

Commitment

In line with our environmental policy, all pencils 'Made in Germany' are made from wood sourced from certified, sustainably managed forests.

Raw Materials

We set very high standards here; our raw materials must comply with both international and particularly stringent European guidelines and thus often demonstrate better quality standards than those required in many countries.

Production

Our manufacturing processes are continually reviewed and improved from an ecological stand point. For example, our unique and award-winning bio-composite manufacturing process for Noris eco and Noris colour saves both energy and wood – truly a vision of the future of pencil production.

Packaging

We ensure no additional packaging is used and that many of our packages serve an additional purpose, such as our Gratnells trays for classpacks. Our products are quick and easy to stack making highly efficient use of every millimetre during transport.

Logistics/Transport

Through our Eurologistic centre in Nuremberg our products are centrally supplied directly, avoiding detours via interim storage warehouses. We also ensure that the shipping companies we use live up to our high expectations, transporting our products safely and in an environmentally efficient manner.

introducing... The Noris family

Noris! For most of us, it's part of our childhood, particularly the yellow and black Noris school pencil.

The leading pencil brand in the UK and many other countries, Noris is now over 100 years old with the famous striped finish dating back to 1934. Today, the brand is synonymous with quality writing and drawing products for the education sector.

An entire Noris family has evolved comprising blacklead and coloured pencils, jumbo versions for learners, sharpeners, erasers and other key products.

The latest edition to the family is the Noris classroom caddy and the Noris digital pencil. And so the Noris story continues...

NEW packaging
for education
essentials for 2018

NEW to the Noris family

The NEW Noris classroom caddy has been specifically designed with schools in mind, showcasing classroom favourites including the Noris black and yellow striped pencil and the Noris colour colouring pencil. The caddy acts as a handy storage unit that can be placed in the centre of the table, displaying the barrel of the coloured pencils so that they are easily identifiable by children. It also has a handle for simple transportation.

Classroom caddy contains 72 Noris blacklead pencils and 72 Noris colour colouring pencils, 6 each of 12 colours.

Pencils

Famous throughout the world for its range of quality blacklead pencils, STAEDTLER leads the field in technical innovation combined with environmentally friendly production processes and the responsible use of natural resources.

In particular, STAEDTLER supports the regeneration of timber resources and ensures that all its 'Made in Germany' wood pencils are manufactured using wood from certified, sustainably managed forests.

Noris® digital pencil

The combination of tradition and innovation - for the most natural writing and design possible.

The graphite pencil: It is the humble pencil that we learned to write, made drawings brimming with imagination, took essential notes and perhaps even wrote our first love letter.

Staedtler has therefore endeavoured to bring together the charm of a high-quality analogue graphite pencil and the innovative Samsung S-Pen in the Staedtler Noris digital, harnessing the strengths of tradition and technology.

Compatible with Various Samsung Devices

- **Phone:** Galaxy Note3/Galaxy Note4/Galaxy Note5/
Galaxy Note3 Neo/Galaxy Note Edge
- **Tablet:** Galaxy Note 10.1 2014/Galaxy Tab A 9.7 with S Pen/
Galaxy Tab A 10.1 with S Pen/Galaxy Tab S3/
Galaxy Note Pro 12.2/Galaxy Tab A 8.0 with S Pen/
Galaxy Book
- **Chromebook:** Chromebook Plus/Chromebook Pro
- **Notebook:** Notebook9 Pro 13.3/15.0 inch

Pack sizes

- 1 x Noris digital pencil: 180 22-1

EMR Technology - The centerpiece of Staedtler Noris digital lies in its tip, produced by Wacom. The EMR principle of the interactive high resolution electromagnetic resonance between the screen and the stylus tip provides instant graphic rendering without battery power. The pen works on virtually any Samsung display compatible with S-Pen stylus

Lumocolor refill stations

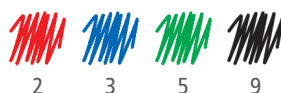

Practical refill stations for easy and clean refilling of Lumocolor pens and markers. Simply insert the pen or marker into the refill station, minutes later, the pen is ready for use; after 3-4 hours it is completely refilled. It is impossible to overfill pens and markers as they can only draw their own maximum ink content out of the refill station.

The 611 S 'park and write set' makes an ideal parking place for Lumocolor whiteboard markers.

Pack sizes

- 'Park and write set' for whiteboard markers: 611 S
- Whiteboard 15ml refill station with ink equivalent of up to 5 pens or 17 refills: 488 51-Col.No
- Flipchart 30ml refill station with ink equivalent of up to 7 pens or 10 refills: 488 56-Col.No
- Permanent 15ml refill station with ink equivalent of up to 10 pens or 33 refills: 487 17-Col.No
- Non-permanent 15ml refill station with ink equivalent of up to 10 pens or 33 refills: 487 15-Col.No

Metal sharpener

These user friendly, quality double-hole and single-hole sharpeners are suitable for use with regular and chunky pencils. Both sharpeners feature a sharpening angle of 23° for standard blacklead pencils, which ensures a long sharp point for clearer, more accurate lines. The double-hole sharpener also features a sharpening angle of 30° which creates broad soft lines for coloured pencils.

Pack sizes

- Box of 12 40g glue sticks: 960 40 NCA

Craft

Creativity in the classroom has never been more exciting than with STAEDTLER's art and craft range. Specifically designed for the education sector, the range is perfect for sparking children's imaginations and for encouraging manual dexterity. Best of all, the FIMO range creates practically no mess and involves minimal clearing up after a craft session.

The FIMO kids classpack contains colourful FIMO kids modelling clay, specifically designed for children. It's softer and does not require conditioning, allowing children to create lasting works of art in minutes which can then be hardened permanently in a conventional oven. The classpacks feature interesting educational projects for all the class to make, along with detailed instructions for two Key Stage specific projects.

FIMO air basic and FIMO air light are air drying alternatives offering the same craft potential as FIMO kids but without the need to bake, so particularly suitable for younger children.

Perfect for modelling and moulding, all FIMO clays can be mixed with FIMO accessories such as metallic powders and, after drying, they can be painted, varnished, glued or drilled.

Encourage your class to explore the world of FIMO – creativity at their fingertips.

FIMO kids classpack

FIMO kids offers everything you know and trust about FIMO clays in a softer to handle consistency, that bakes hard (bake at 110°C for 30 minutes) to withstand the tough demands of play. With the introduction of child-friendly tools perfectly suited to children's hands, it is a must-have for any classroom.

- Extremely soft with a pleasant feel
- Ideal for small hands in the classroom
- Vibrant colours
- Easy to use
- CE Certified

FIMO® kids colour packs

8034 01 LZ

FIMO kids colour packs are an ideal introduction to the world of modelling. Both packs contain 6 assorted colours with resealable packaging. Available in single packs.

Pack sizes

- FIMO kids colour pack basic: 8032 01
- FIMO kids colour pack pastels: 8032 02

8032 01

8032 02

FIMO kids is a softer more pliable clay, ideally suited for smaller hands. The 8 years + warning on the packaging relates to the process of the FIMO being baked which requires oven-use, and that process must be done by children over the age of 8 years, with adult supervision. The function of creating toys and models using the clay is suitable for children under the age of 8 years, with adult supervision.

FIMO® air basic

FIMO air basic is a high quality air-drying modelling clay. This clay-like material is extremely break resistant and can be worked like wood or clay to achieve some incredible results. Made from 97% natural substances, there is no need to bake or fire, making it ideal for the classroom.

Metalized foil packaging prevents the modelling clay from drying out, guaranteeing consistently high quality and a long storage life.

Available in 3 colours.

Pack sizes

- FIMO air basic 500g block, available in 3 colours: 8100-Col. No
- FIMO air basic 1000g block, available in 3 colours: 8101-Col. No

STAEDTLER®

Competitions

World Kids Colouring Day

World Kids Colouring Day, launched in the Spring, is all about creativity. Each year we call on teachers and pupils to celebrate with STAEDTLER Teachers' Club by completing themed colouring activity sheets, available for both Key Stage 1 and Key Stage 2.

Members will receive all the necessary tools to enter their class into this exciting national competition, with the chance to win some great prizes for themselves and their classmates.

Sketching Stars

Each year STAEDTLER Teachers' Club teams up with a top artist or illustrator to bring its members Sketching Stars; a creative competition to find the next generation of young sketchers. Winners can build on their talent at bespoke art workshops, where they will receive expert advice and guidance from the Sketching Stars artist.

"We were surprised and delighted that one of our pupils had won the World Kids Colouring Day competition. The children thoroughly enjoyed the art workshop with artist Picasso Griffiths. Thank you to STAEDTLER for arranging an informative and fun learning day which the children of St John's enjoyed immensely!"

Mrs Lynch, Year 4 Class teacher
St John's Primary School, Redhill

"The children had a fantastic morning of art, which stimulated their imagination and indeed gave me great ideas for future art lessons"

Mrs Coyle, St. Anne's Primary
School, Derry
