

# Create your own Tiger Finger Puppet

oven hardening modelling material

## WHAT YOU NEED:

- FIMO - assorted colours
- Craft knife

## SKILLOMETER

8+ adult supervision required

**1** Flatten some orange FIMO and cut into a semi circle. Wrap loosely around your finger and smooth the edges together to make a cone.

**2** Roll out some long, thin, black strands and wrap around the bottom of the body. Press three shorter strands on the top of the head.

**3** Make two, short, fat, orange sausages and add a white blob to one end. Press these on to the front of the tiger and add a white triangle as the mouth and a black triangle as the nose.

**4** Flatten two orange balls into discs and pinch to make an ear shape. Press on to either side of the head. Finish your tiger by adding two small black blobs for eyes, and two blobs of orange for the front paws. You can make whisker marks using a cocktail stick and don't forget a sausage shape for a tail at the back! Bake according to instructions and allow to cool.
